

DEVON CHEN

Assistant Project Engineer | Electrical & Electronic Specialist

Email: devon.chen.eng@gmail.com | Location: Singapore, SG | LinkedIn: linkedin.com/in/devon-chen

Professional Summary

Highly motivated Electrical & Electronic Engineering graduate acting as an Assistant Project Engineer. Experienced in bridging the gap between theoretical electrical concepts and actual physical execution on-site. Demonstrated success in managing critical master schedules, establishing accurate cost estimations, supervising site installations, and coordinating functional testing of medium-voltage switchboards and power networks.

Work Experience

Assistant Project Engineer — Apex Electrical & Infrastructure Systems

June 2024 – Present | Project Budget: \$1.8M USD | Substation Upgrade Program

- Supported structural engineering leads in delivering a high-voltage substation switchgear upgrade program safely, on time, and 3% under budget.
- Engineered and updated standard Single-Line Diagrams (SLD) and cable route plans using AutoCAD design tools.
- Monitored installation phases of medium-voltage transformer stations and secondary switchboard circuits, ensuring compliance with local grid codes.
- Managed and expedited sub-contractor progress schedules, coordinating material inventory pipelines to reduce on-site idle times.
- Compiled comprehensive test records and system logs for customer sign-offs during pre-commissioning insulation resistance testing.

Graduate Electrical Intern — VoltLine Power Solutions Ltd

January 2024 – May 2024 | Commercial Smart-Grid Integration

- Assisted standard sizing and calculations for solar photovoltaic wiring schemes, protection relays, and circuit breaker installations.
- Executed field measurements, verified panel safety metrics, and tracked technical data logs for three green energy micro-grids.
- Assisted senior managers during site walkthroughs to audit Contractor Bill of Quantities (BoQ) against actual spatial configurations.
- Maintained organized, ISO-compliant project files including Method Statements, site risk documentation, and drawing registers.

Education

B.Eng (Hons) in Electrical & Electronic Engineering (First Class Honours)

National University of Singapore | 2020 – 2024

Key Modules: Power Systems Analysis, Control Systems Design, Project Management Economics, High Voltage Engineering, Renewable Energy Systems.

Skills Inventory

Project Management

- Site Scheduling & Gantt
- Subcontractor Controls
- Cost Estimation & BoQ Audits
- Workplace Safety (WSH)

Electrical Design & Testing

- Single Line Diagrams (SLD)
- Switchgear Configuration
- High Voltage Testing
- MV Transformer Auditing

Software & Systems

- AutoCAD Electrical
- MATLAB & Simulink
- MS Project / Excel
- ETAP Power Simulator
